Throughout Latin America, observers and activists have found in religion a promise of deep and long-lasting democratization. But for religion to change culture and politics, religion itself must change. Such change is not only a matter of doctrine, ritual, or institutional arrangements but also arises out of the needs, values, and ideas of average believers. Combining rich interviews and community studies in Venezuela and Colombia with analysis of broad ideological and institutional transformations, Daniel Levine examines how religious and cultural change begins and what gives it substance and lasting impact. The author focuses on the creation of self-confident popular groups among hitherto isolated and dispirited individuals. Once silent voices come to light as peasants and urban barrio dwellers reflect on their upbringing and community, on poverty and opportunity, on faith, prayer, and the Bible, and on institutions like state, school, and church. Levine also interviews priests, sisters, and pastoral agents and explains how their efforts shape the links between popular groups and the larger society. The result is a clear understanding of how relations among social and cultural levels are maintained and transformed, how programs are implemented, why they succeed or fail, and how change appears both to elites and to ordinary people. Originally published in 1992, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The first edition of The Psychology of Health has become the standard recommended text for many courses. This completely revised and updated second edition contains new material in all chapters and has several additional chapters on such topics as cancer, nutrition and exercise, social drugs, and the impact of social inequalities upon health. The Psychology of Health will continue to be invaluable for students of health psychology and related fields, including nursing, social work, community care and health studies. The Psychology of Health, second edition, is:
\* comprehensive: its four parts cover the scope and ambition of health psychology, acute and chronic illness, hospitalisation and the management of disease, primary prevention and health promotion, the importance of the family and the wider social context for health
\* user-friendly: includes tables, figures and boxes with discussion ideas and questions in each chapter. Prefaces to each part, key point summaries and a glossary of terms give students a useful framework for revision
\* clearly written by an experienced team involved in undergraduate teaching
\* a source for further study: with annotated guides to reading and an extensive bibliography.

Soon after their arrival in Spain the authors realized that the early Muslim art of Seville was curiously different from that of Cordova. This fascinated them and they undertook eight years of study in Seville, making use of the resources available to them in the city’s libraries to bring their audience this history of the Muslims in Spain. The study was first published in 1912. Concentrating on Seville, they provide a chronological narrative of Spain from the Muslim invasion of 711 until the Reconquista of the fifteenth century. The scene is set for the invasion by an evaluation of the situation under the Goths. Following this the many influences on the culture and civilization of Andalucía are discussed, and how the richness of Roman and Gothic art and architecture was augmented by the Yemenite Arabs and Coptic Egyptians. The book concludes with an examination of the events following the Reconquista in Spain, and of the Arabs’ lasting visual impact on Spanish history.

Winner of the MLA’s Katherine Singer Kovacs Prize for an outstanding book published in English in the field of Latin American and Spanish literatures and culture (1999) For Anglos, the pulsing beats of salsa, merengue, and bolero are a compelling expression of Latino/a culture, but few outsiders comprehend the music’s implications in larger social terms. Frances R. Aparicio places this music in context by combining the approaches of musicology and sociology with literary, cultural, Latino, and women’s studies. She offers a detailed genealogy of Afro-Caribbean music in Puerto Rico, comparing it to selected Puerto Rican literary texts, then looks both at how Latinos/as in the US have used salsa to reaffirm their cultural identities and how Anglos have exoticized and depoliticized it in their adaptations. Aparicio’s detailed examination of lyrics shows how these songs articulate issues of gender, desire, and conflict, and her interviews with Latinas/os reveal how they listen to salsa and the meanings they find in it. What results is a comprehensive view “that deploys both musical and literary texts as equally significant cultural voices in exploring larger questions about the power of discourse, gender relations, intercultural desire, race, ethnicity, and class.”

Examines the creation of an essentialist view of nationhood based on a peasant culture and a unifying Hispanic heritage, and the ways in which grassroots organizations challenge and reconfigure definitions of national identity through their own activities and representations.

Protestant evangelicalism has spread rapidly in Latin America at the same time that foreign corporations have taken hold of economies there. These concurrent developments have led some observers to view this religious movement as a means of melding converts into a disciplined work force for foreign capitalists rather than as a reflection of conscious individual choices made for a variety of personal, as well as economic, reasons. In this pioneering study, Elizabeth Brusco challenges such assumptions and explores the intra-household motivations for evangelical conversion in Colombia. She shows how the asceticism required of evangelicals (no drinking, smoking, or extramarital sexual relations are allowed) redirects male income back into the household, thereby raising the living standard of women and children. This benefit helps explain the appeal of evangelicalism for women and questions the traditional assumption that organized religion always disadvantages women. Brusco also demonstrates how evangelicalism appeals to men by offering an alternative to the more dysfunctional aspects of machismo. Case studies add a fascinating human dimension to her findings. With the challenges this book poses to conventional wisdom about economic, gender, and religious behavior, it will be important reading for a wide audience in anthropology, women’s studies, economics, and religion. For all students of Latin America, it offers thoughtful new perspectives on a major, grass-roots agent of social change.

This book uses historical and interview data to trace the development of Puerto Rican identity in the 20th century. It analyzes how and why Puerto Ricans have maintained a clear sense of distinctiveness in the face of direct and indirect pressures on their identity. After gaining sovereignty over Puerto Rico from Spain in 1898, the United States undertook a sustained campaign to Americanize the island. Despite 50 years of active Americanization and another 40 years of continued United States sovereignty over the island, Puerto Ricans retain a sense of themselves as distinctly and proudly Puerto Rican. This study examines the symbols of Puerto Rican identity, and their use in the complex politics of the island. It shows that identity is dynamic, it is experienced differently by individuals across Puerto Rican society, and that the key symbols of Puerto Rican identity have not remained static over time. Through the study of Puerto Rico, the book investigates and challenges the widely-heard argument that the inevitable result of the export of U.S. mass media and consumer culture throughout the world is the weakening of cultural identities in receiving societies. The book develops the idea that external pressure on collective identity may strengthen that identity rather than, as is often assumed, diminish it.

This volume contains eight essays that are at the intersection of two important areas within linguistics: conversational analysis, and the use of narrative in the creation, mediation and resolution of conflict. The contributors explore these issues in a variety of cultures and languages.

Nina Raine’s Tiger Country is a hospital play that follows a tangle of doctors and nurses in a busy London hospital - from the award-winning author of Tribes. Professionalism and prejudice, turbulent staff romances, ambition and failure collide in this swirling, action-packed drama about an overburdened health service that we all depend on and the dedicated individuals that keep it going. ‘Tiger country’ is where animal instinct stirs and an irrefutable eye opens. Where we make eye contact with the unknown. Tiger Country was premiered at Hampstead Theatre in 2011 and, following its sell-out run, was revived there in 2014.
